DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15, 17-18 and 20-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest a reactor capable of extended growth of a gallium containing single crystal as claimed and specifically comprising: an extended material (e.g. gallium) source partially inside and partially outside of the reactor tube and within a multi-zone material (e.g. gallium) source zone, said extended material source having a length so that different portions of said extended material source are capable of being maintained at different temperatures, said extended material source being controllably positionable so that said multi-zone heater is capable of maintaining a first portion of said extended material source at a first temperature while simultaneously maintaining a second portion of said extended material source at a second temperature. Further, no other piece of prior art was located that provided the missing teaching(s) along with the requisite motivation for combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
